## PROJECTS

- Personal Portfolio Website (HTML, CSS, JavaScript):** (purpose) To provide potential employers and clients with a comprehensive view of my skills, experience, and creative process. The site includes an interactive resume, detailed project case studies, and a contact form for inquiries. Implemented using HTML, CSS, and JavaScript with a focus on clean design, usability, and responsive layout to ensure optimal performance across devices.
- EventLitez - Event Listing Website (HTML, CSS, JavaScript):** Developed EventLitez, a beginner-friendly platform that enables users to create, view, and manage events, offering an intuitive and functional experience. The website features a streamlined event creation process through a user-friendly form where users can input essential details such as event name, date, time, and location. The event listings are displayed in a clean and organized manner, allowing users to easily browse and view upcoming events.
- Banking Management System (Java, SQL):** Developed a Banking Management System using Java and SQL to manage customer accounts, transactions, and banking operations. Implemented features such as account creation, balance inquiry, deposits, withdrawals, and transaction history. Designed the backend with SQL for secure data storage and retrieval, ensuring data integrity and efficient query handling. Focused on creating a user-friendly interface and robust error handling to enhance user experience and system reliability.
